

WALCO-LINCK COMPANY
18 Ford Products Road
Drawer A
Valley Cottage, NY 10989

MATERIAL SAFETY DATA SHEET

SECTION I: PRODUCT IDENTIFICATION

MANUFACTURER'S NAME: Walco-Linck Company
EMERGENCY PHONE NUMBER: (914) 353-7600
TRADE NAME: TAT Roach Killer VI, EPA Reg. No. 506-125
CHEMICAL NAME: N/A: Proprietary Formula
CHEMICAL FAMILY: N/A: Proprietary Formula
MOLECULAR FORMULA: N/A: Proprietary Formula

SECTION II: HAZARDOUS INGREDIENTS

| | | |
|------------------------|-------|----------------------------|
| Baygon (CAS #114-28-1) | 2.00% | TLV: 0.5 mg/m ³ |
|------------------------|-------|----------------------------|

SECTION III: PHYSICAL DATA

| | |
|--|---|
| Appearance: Brown or yellow paste in metal container Odor: Peanut butter-like Boiling Point: None to decomposition Vapor Pressure: Not Determined Vapor Density: Not Determined | Bulk Density: 71.18 pounds/cubic foot Solubility in Water: Not soluble Percent Volatile: Not Determined Evaporation Rate: Not Determined Melting Point: 30°F |
|--|---|

SECTION IV: FIRE AND EXPLOSION HAZARD DATA

| | |
|---|--|
| Flash Point: None Fire Extinguishing Media: Not Applicable Special Fire-Fighting Procedures: Fire fighters should use self-contained breathing apparatus and remove all unprotected persons from the area. Products of combustion from fires involving this product may be toxic. Avoid breathing smoke and mists. Avoid personnel and equipment contact with fallout and runoff. Minimize the amount of water used for fire fighting. Contain and isolate runoff and debris for proper disposal. Decontaminate personal protective equipment and fire fighting equipment before reuse. Unusual Fire and Explosion Hazards: Toxic fumes from burning containers and packaging may cause inhalation hazard. Normal combustion forms carbon dioxide and water vapor. Incomplete combustion can produce carbon monoxide. NFPA RATINGS: Health = 1; Flammability = 1; Reactivity = 0; Special = Not Determined [Least = 0; Extreme = 4] | Flammable Limits: Not Flammable |
|---|--|

SECTION V: HEALTH HAZARD DATA

Threshold Limit Value: Not Determined
Primary Route of Exposure: None Expected
Effects of Overexposure: This hazard evaluation is based on data from similar products/materials. **EYE CONTACT:** This product is not expected to cause prolonged or significant eye irritation. **SKIN CONTACT:** This product is not expected to cause prolonged or significant skin irritation. **DERMAL TOXICITY:** The systemic toxicity of this product has not been determined. However, it should be practically non-toxic to internal organs if it gets on the skin. **RESPIRATORY/INHALATION:** The systemic toxicity of this product has not been determined. However, it should be practically non-toxic to internal organs if inhaled. **INGESTION:** The systemic toxicity of this product has not been determined. However, it should be practically non-toxic to internal organs if swallowed.

Effects of Overexposure (continued):

This product contains a carbamate insecticide which inhibits the enzyme cholinesterase. Signs and symptoms which may be seen, usually within one to two hours following overexposure, may include (but may not be limited to) headache, constriction of the pupil of the eye, blurred vision, excessive salivation or nasal discharge, profuse sweating, abdominal cramps, nausea, vomiting and diarrhea. Convulsions are rarely seen in carbamate poisoning.

Note to Physician: In severe poisoning, measurement of blood cholinesterase activity may be used in monitoring exposure, but may not be reliable detectors of carbamate poisoning because enzyme activities may revert to normal within minutes or hours of exposure. If signs of cholinesterase inhibition appear, atropine sulfate is antidotal.

Emergency and First Aid Procedures: **EYE CONTACT:** Rinse thoroughly with clean water. **SKIN CONTACT:** Wash with soap and water. Remove and wash contaminated clothing. **INHALATION:** Since this material is not expected to be an immediate inhalation problem, no first aid procedures are required. If necessary, seek fresh air. **INGESTION:** If swallowed, drink one or two glasses of water and induce vomiting by touching the back of the throat with a finger. If possible, contact a physician, poison control center or emergency center before inducing vomiting. Do not induce vomiting or give anything by mouth to an unconscious or convulsing person. Take person and product container to the nearest emergency treatment center. See *Note to Physician* above.

SECTION VI: REACTIVITY DATA

Stability: Stable

Conditions to Avoid: None known

Incompatibility (Materials to Avoid): May react with strong acids or strong oxidizing agents such as chlorates, nitrates, peroxides, etc.

Hazardous Decomposition Products: Not applicable

Hazardous Polymerization: Will not occur

Conditions to Avoid: None known

SECTION VII: SPILL OR LEAK PROCEDURES

Steps to be Taken in Case Material is Released or Spilled: This product is toxic to birds and other wildlife. This product is toxic to aquatic organisms and should be kept out of sewage and drainage systems and all bodies of water. Do not apply directly to water or wetlands. Do not contaminate water by cleaning of equipment or disposal of waste. If container has broken, apply absorbent material and sweep into nonpermeable containers for disposal.

Waste Disposal Method: Partially filled containers may be disposed of by securely wrapping in several layers of newspaper and discarding in trash. Do not reuse any empty containers. Wrap securely in newspaper and discard in trash.

SECTION VIII: SPECIAL PROTECTION INFORMATION

Respiratory Protection: None required

Ventilation: Normal

Other Protective Clothing: None required

SECTION IX: SPECIAL PRECAUTIONS

Precautions to be Taken in Handling and Storing: *It is a violation of Federal law to use this product in a manner inconsistent with its labeling.* Read entire label before using. Use strictly in accordance with label precautionary statements and directions. Keep product in its original container. Do not contaminate food or feed. Store in a secure, preferably locked, cool, dry storage area away from heat, open flame and direct sunlight.

SECTION X: REGULATORY INFORMATION

This product contains 2.00% Baygon [2-(1-methylethoxy)phenyl methylcarbamate], CAS Number 114-26-1. The remaining composition (98.00%) is inert ingredients.

Baygon is a toxic chemical subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372. Category:

One (1): Immediate (Acute) Health Effects

Baygon is also found on the following regulatory lists: Massachusetts Right-to-Know, Pennsylvania Right-to-Know, New Jersey Right-to-Know, Minnesota Right-to-Know, ACGIH TLV (0.5 mg/m³) and OSHA TWA (0.5 mg/m³).

DOT SHIPPING NAME: Insecticides, NOI-NMFC 102120

DOT HAZARD CLASS: Not Hazardous

Rev. 10/95

Supersedes 10/93 Version

The information provided herein was believed to be accurate at the time of preparation and prepared from a compilation of sources believed to be reliable, but it is the responsibility of the user to investigate and understand other pertinent sources of information, to comply with all laws and procedures applicable to the safe handling and use of this product and to determine the suitability of the product for its intended use. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
